Email Inspect

AI-Powered DMARC & Email Security

Protect your domain with intelligent, automated email security.

A new era of email security, driven by Artificial Intelligence

The Email Security Crisis

Four critical challenges threatening your domain and email infrastructure

Phishing & Spoofing

Direct financial loss, brand damage, and data breaches from sophisticated email attacks.

New Sender Requirements

Google, Yahoo, and Microsoft mandate DMARC, SPF, and DKIM. Non-compliance means spam.

Compliance Risk

Global regulations (GDPR, DORA, NIS 2) require demonstrable email security, leading to massive fines.

Complexity

Manual DMARC monitoring and policy enforcement is time-consuming, error-prone, and requires specialized expertise.

Introducing EmailInspect

An advanced, AI-powered platform that automates DMARC monitoring, anomaly detection, and compliance reporting to secure your domain and ensure email deliverability.

Automation

Turn complex DMARC data into simple, actionable insights.

Intelligence

Detect threats and anomalies that traditional systems miss.

Compliance

Provide necessary reporting for global regulations.

The AI Advantage

Our proprietary AI engine moves beyond simple reporting to predictive security.

AI Anomaly Detection
Advanced machine learning algorithms detect suspicious email patterns and threats in real-time, catching sophisticated spoofing attempts.

AI Advanced Analysis
Deep analysis of email authentication records with AI-powered insights for rapid policy enforcement.
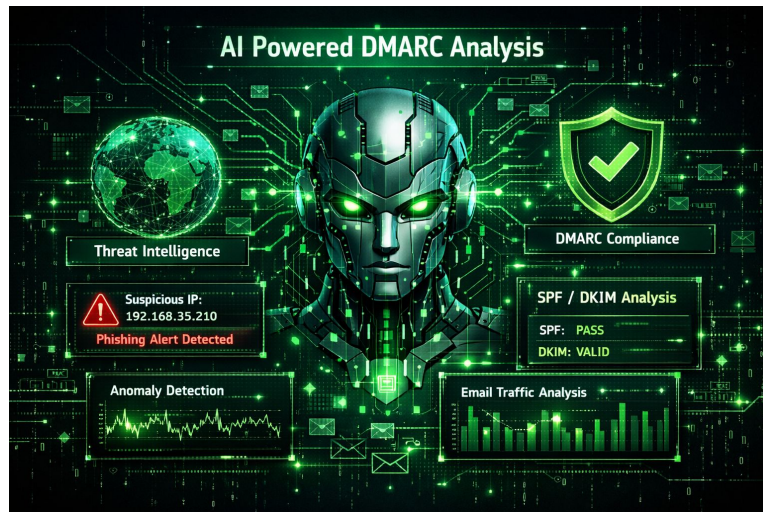

AI Based Monitoring & Alerting
Intelligent alerting system that learns from your email patterns to reduce false positives and alert only on genuine threats.
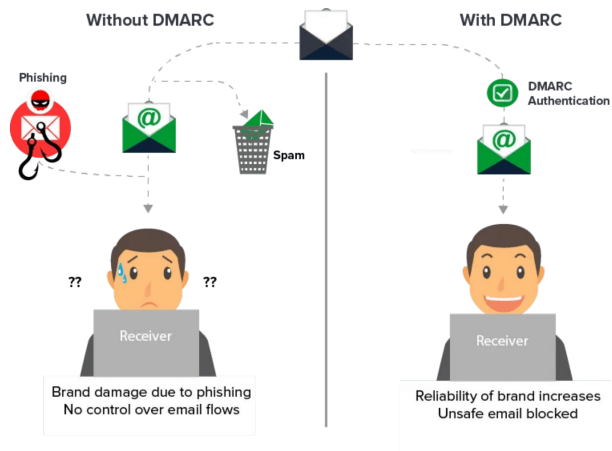

AI Policy Recommendations
Automated, data-driven suggestions to move your DMARC policy to enforcement safely and quickly.

Comprehensive Protection

Beyond DMARC: A full-spectrum security suite

Real-Time DMARC Monitoring
Detailed aggregate and forensic reports on all email traffic with instant alerts.

TLS Reporting (TLS-RPT)
Comprehensive analysis of email encryption and secure communication channels.

IP Reputation Monitoring
Track and manage your sending IP reputation to maintain high deliverability.

Interactive Dashboard
User-friendly interface with real-time metrics and actionable insights.

On-Premise Setup
Deploy on your own infrastructure for maximum data security and compliance requirements.

Market & Compliance Drivers

The regulatory landscape is driving unprecedented demand for advanced email security solutions.

Mandatory Requirement

Microsoft, Google & Yahoo

Mandatory DMARC for deliverability. EmailInspect ensures you meet these essential requirements for high-volume senders.

EU Directive

DORA & NIS 2

Directives requiring robust ICT and cybersecurity risk controls. EmailInspect provides monitoring and reporting.
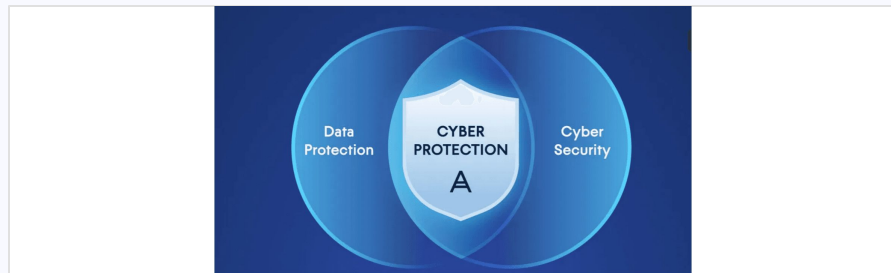

Data Privacy Law

GDPR & CCPA

Privacy laws demand secure channels and DMARC enforcement. TLS reporting and enforcement are key to compliance.

Industry Standard

PCI DSS 4.0

PCI standards require technical controls to protect sensitive data. EmailInspect helps secure the email channel.

Simple, Transparent Pricing

🎉 15-Day Free Trial • No credit card required

Monthly | Annual [Save 20%]

Personal Plan

Best for personal use and individual email security

Monthly
$0

Annual
$0

- ✓ 1 team member
- ✓ 1 protected domain
- ✓ 500 monitored emails/month
- ✓ Hosted DMARC, TLS-RPT
- ✓ 1-month data retention

Basic Plan

Best for small businesses starting their email security journey

Monthly
$15.9

Annual
$153.5

🏷️Save 20%

- ✓ 2 team members
- ✓ 2 protected domains
- ✓ 20,000 monitored emails/month
- ✓ Real-time security alerts
- ✓ 6-month data retention

Most Popular

Professional Plan

Perfect for growing organizations seeking AI-powered email security

Monthly
$29.9

Annual
$287.9

🏷️Save 20%

- ✓ 5 team members
- ✓ 5 protected domains
- ✓ 50,000 monitored emails/month
- ✓ AI anomaly detection
- ✓ AI policy recommendations

Enterprise Plan

Enterprise-grade protection for mission-critical email systems

Monthly
$39.9

Annual
$383.9

🏷️Save 20%

- ✓ 10 team members
- ✓ 10 protected domains
- ✓ 200,000 monitored emails/month
- ✓ Advanced compliance reporting
- ✓ Dedicated account manager

Secure Your Domain Today

Join organizations worldwide protecting their email infrastructure with EmailInspect's AI-powered security platform.

Start Your 15-Day Free Trial

Experience the full power of AI-driven DMARC monitoring with no credit card required.

Book a Personalized Demo

See how EmailInspect can solve your specific security challenges with our expert team.

Check Your Domain Health

Use our free tool for an instant DMARC analysis and deliverability assessment.

Our Next Steps

Expand AI capabilities for predictive threat modeling and advanced anomaly detection.

New integrations with SIEM and SOAR platforms for seamless security orchestration.
